Vol. 5, No. 1, 1972

Original Communications:

The Sinus Venosus-atrial Wenckebach-Luciani Phenomenon.
By *M. E. Valentinuzzi* and *H. E. Hoff* 1

Stretch-induced Excitation and Conduction Disturbances in the Isolated Rat Myocardium.
By *J. F. Spear* and *E. N. Moore* 15

Revised Lead-Equations for Frontal-Plane Electrocardiography.
By *P. C. Y. Wong* and *T. Y. Lee* 25

Critical Prolongation of AV Conduction Time as the Inciting Mechanism in Reentrant Tachycardia.
By *W. J. Mandel, A. I. Kermaier, R. L. Blum,* and *H. Hayakawa* 39

Comparison of the 12-Lead and Orthogonal Electrocardiograms, with Special Reference to the Frontal QRS Axis.
By *J. J. Arriaga, G. Scampardonis,* and *Y. Watanabe* 47

The Relationship Among Pacemaker Location, Heart Rate, and P-Wave Configuration in the Dog.
By *M. H. Hinds, D. R. Clark, J. C. McCrady,* and *L. A. Geddes* 56

Overdriving by Pacing to Suppress Ventricular Ectopic Activity.
By *L. Lopéz* and *E. Sowton* 65

Mobitz Type II AV Block as a Manifestation of Digitalis Toxicity.
By *B. K. Yeh, P. Tao,* and *N. de Guzman* 74

Case Reports:

Ventricular Bigeminy and Quadrigeminy Occurring in a Case of Subarachnoid Hemorrhage.
By *McKamy Smith* 78

Double-Bifocal-Ventricular Parasystole.
By *J. Roelandt, J. Pool,* and *L. Schamroth* 86

Transient Complete Left Bundle Branch Block and Left Anterior Hemiblock Demonstrated by Biplane Timed Vectorcardiograms.
By *K. B. Desser* and *A. Benchimol* 90

Annotations:

Macruz Index and Measurement Errors: A Critical Evaluation.
By *I. Välimäki* 96

Precordial Calibration.
By *Z. Z. Zao* 99

Letters to the Editor:

False Bilateral Bundle Branch Block.
By *R. P. Lasser* 100A

Reply:
By *J. A. Abildskov* 100A

Vol. 5, No. 2, 1972

Original Communications:

ST-T Changes Induced by Digitalis and Ventricular Hypertrophy: Differentiation by Quantitative Analysis.
By *P. M. Kini, J. L. Willems, C. Batchlor, and H. V. Pipberger* 101

Intraventricular Propagation Time: Biphasic Effect of Epinephrine.
By *R. L. Williams, R. L. Vick, and D. A. Biopel* 111

The Frank Vectorcardiogram of the Beagle Dog.
By *W. N. Block, K. A. Busch, and T. R. Lewis* 119

Right Bundle Branch Block Combined with Left Axis Deviation: Vectorcardiographic Study of 48 Cases.
By *M. Cerqueira-Gomes, J. Correia-dos-Santos, R. Paula-Pinta C. Abreu-Lima, C. Ramalhao, and F. Rocha-Goncalves* 127

Chaotic Atrial Rhythm.
By *R. Berlinerblau and W. Feder* 135

Experimental Bigeminal Arrhythmia in the Dog.
By *C. N. Peiss* 145

Electrocardiogram in Tetralogy of Fallot.
By *D. L. Roberts, H. R. Wagner, and E. C. Lambert* 155

Scalar and Vectorcardiographic Residua of Inferior Myocardial Infarct.
By *C. A. Hamilton, R. Bower, H. Starke, and R. Stratbucker* 163

Electrical Properties of the cells at the Purkinje Fiber-Myocardial Cell Region of the Mammalian Heart.
By *T. Sano and T. Sawanobori* 173

Case Reports:

Observations on the Duration of Wedensky Facilitation in the Left Bundle Branch.
By *H. D. Friedberg* 185

Changes Simulating Hypothermia in the ECG in Subarachnoid Hemmorhage.
By *J. de Swiet* 193

Effect of Diphenylhydantoin on Intraventricular Conduction Disturbance: Report of a Case.
By *R. Haiat, M. Chapelle, R. Benaim, S. Witchitz, and P. Chiche* 197

An Unusual Cause for AV Dissociation.
By *K. Wang and H. G. Richman* 203

Annotations:

Effect of Glucagon on Intraventricular Conduction.
By *A. H. Kahn and D. H. Spodick* 207

Design of an Epicardial Catheter Electrode for Sensing Cardiovascular Potentials.
By *A. J. Salkind and A. Freeman* 209

Vol. 5, No. 3, 1972

Original Communications:

A Rapid Assay of Dipolar and Extradipolar Content in the Human Electrocardiogram.
By *L. G. Horan, N. C. Flowers, and C. B. Miller* 211

Standard 12-Lead Scalar Electrocardiogram, An Assessment of Left Ventricular Performance.
By *J. Thomsen, J. Buell, D. Spring, and R. Wasserburger* 225

Continuous Recording of His Bundle Electrogram during Selective Coronary Cineangiography in Man.
By *F. K. Nakhjavan* 233

Atrial Recovery Wave (P_T) Studied by Averaging Computer Technique in Patients with Complete AV Block.
By *E. Sivertssen* 243

Left Posterior Hemiblock Pattern in Cases of Paroxysmal Atrial Tachycardia in Infants and Children.
By *J. Videbaek and J. E. Olsen* 253

Excitation Contraction Correlates in True Ischemia.
By *D. T. Miller and J. P. Gilmore* 257

Bigeminal Rhythm. VCG Patterns in Coronary Artery Disease.
By *O. Zoneraich and S. Zoneraich* 265

Recent Progress:

Polarcardiographic Study of Hospital Staff—Abnormalities Found in Smokers.
By *G. E. Dower and J. A. Osborne* 273

Case Reports:

Multiple Atrial Arrhythmias in Intra-Atrial and Inter-Atrial Block.
By *M. K. Dayem, N. Aytan, and B. J. Argano* 281

Sino-Atrial Block in Man, Provoked by Quinidine.
By *J. Grayzel and J. Angeles* 289

Intermittent P- and T-Wave Sensing in Demand Pacemakers.
By *E. Tabesh* 295

Wolff-Parkinson-White Syndrome Associated with Myocardial Infarction and Right Bundle Branch Block.
By *L. Schamroth and G. Lapinsky* 299

Vol. 5, No. 4, 1972

Original Communications:

Computer Inerpretation of Frank VCG in Normal Newborns.
By B. Guller, K. Berg, W. Weidman, P. O'Brien, J. DuShane, and R. Smith 307

Elevated ST Segments with Exercise in Ventricular Aneurysm.
By K. N. Manvi and M. H. Ellestad 317

The Atrial Recovery Wave (P_T) Studied by Atrial Pacing Technique in Patients with Complete Heart Block.
By E. Sivertssen and G. Bay 325

Use of an On-Line Computer in the Study of Cardiac Arrhythmia.
By J. R. Holmes 333

A New Method to Measure Non-Uniformity in the Intact Heart.
By N. Sarachek, J. Roberts, and J. Leonard 341

Comparative Analysis of Direct Current Defibrillators.
By G. A. Ewy, R. D. Fletcher, and M. D. Ewy 349

Anatomical Level of X and Z Electrodes in Frank VCG Lead System.
By H. J. Ritsema Van Eck 355

Mathematical Analysis of Body Surface Potentials.
By P. Voukydis 367

Numerical Classification and Coding of Electrocardiograms.
By J. Wartak 373

Recent Progress:

Computer-aided ECG Analysis and Research in Clinical Setting.
By P. Scheinok, L. S. Dreifus, K. W. Thum, M. B. Reich, and A. Krazesky 377

Case Studies:

Sinoventricular Conduction during Atrial Arrest.
By L. Jacobson 385

1:1 Conduction in Atrial Flutter after Intravenous Injection of Aminophylline.
By H. Greenburg and S. Antin 391

A-V and Trifasicular Block: High-grade A-V Block, Idionodal Escape Rhythm with Right Bundle Branch Block and Intermittent Left Anterior and Posterior Hemiblocks.
By L. H. Goldberg and L. Schamroth 395

Suggested Mechanism for Mobitz Type II Block Based on Concealed Atrial Reciprocation.
By N. El-Sherif 401

Hyperkalemic Cardiac Arrest During Transfusion of Stored Blood.
By W. Duvernoy and O. Bostic 407

Subject Index Volume 5

A

Action potential
atrial recovery wave studied by atrial pacing technique in patients with complete heart block, 4:325-332
electrical properties of cells at Purkinje fiber-myocardial cell region of mammalian heart, 2: 173-183
excitation contraction correlates in true ischemia, 3:257-264
new method to measure non-uniformity in the intact heart, 4:341-348

Age
polarcardiographic study of hospital staff — abnormalities found in smokers, 3:273-280

Aminophylline
1:1 conduction in atrial flutter after injection of, 4:391-393

Aneurysm
Left ventricular
elevated ST segments with exercise in, 4: 317-323

Animal studies
Cats
new method to measure non-uniformity in intact heart, 4:341-348
Dogs
electrical properties of cells at Purkinje fiber-myocardial cell region of mammalian heart, 2:173-183
excitation contraction correlates in true ischemia, 3:257-264
experimental bigeminal arrhythmia in, 2: 145-154
Frank VCG of beagle dog, 2:119-125
intraventricular propagation time: biphasic effects of epinephrine, 2:111-118
mathematical analysis of body surface potentials, 4:367-371
Mobitz type II AV block as manifestation of digitalis toxicity, 1:74-77
relationship among pacemaker location, heart rate, & P-wave configuration, 1:56-64
Horses
use of on-line computer in study of cardiac arrhythmia, 4:333-339
Monkeys
mathematical analysis of body surface potentials, 4:367-371
Rats
stretch-induced excitation & conduction disturbances in isolated rat myocardium, 1: 15-24
Snakes
sinus venosus-atrial Wenckebach-Luciani phenomenon, 1:1-14
Turtles
sinus venosus-atrial Wenckebach-Luciani phenomenon, 1:1-14

Arrhythmia
chaotic atrial rhythm, 2:135-144
effect of diphenylhydantoin on intra-ventricular conduction disturbances, 2:197-201
experimental bigeminal arrhythmia in dog, 2: 145-154
multiple atrial arrhythmias in intra-atrial & inter-atrial block, 3:281-288
observations on duration of Wedensky facilitation in left bundle branch, 2:185-191
sinus venosus-atrial Wenckebach-Luciani phenomenon, 1:1-14
unusual cause for AV dissociation, 2:203-205
use of on-line computer in study of cardiac arrhythmia, 4:333-339
ventricular bigeminy & quadrigeminy occurring in case of subarachnoid hemorrhage, 1:78-85

Atherosclerosis
standard 12-lead scalar ECG, an assessment of left ventricular performance, 3:225-231

Atrioventricular conduction
continuous recording of His bundle electrogram during selective coronary cine-angiography in man, 3:233-242
multiple atrial arrhythmias in intra-atrial & inter-atrial block, 3:281-288
1:1 conduction in atrial flutter after intravenous injection of aminophylline, 4:391-393

Atrium
Atrial flutter
1:1 conduction in atrial flutter after intravenous injection of aminophylline, 4:391-393
Atrial pacing
atrial recovery wave studied by atrial pacing technique in patients with complete heart block, 4:325-332
Atrial reciprocation
suggested mechanism for Mobitz type II block based on concealed atrial reciprocation, 4: 401-406
Atrial recovery wave
studied by atrial pacing technique in patients with complete heart block, 4:325-332
studied by averaging computer technique in patients with complete heart block, 3: 243-251
Atrial rhythm
chaotic, 2:135-144

B

Bifocal rhythm
double-bifocal-ventricular parasystole, 1:86-89

Bigeminy
experimental bigeminal arrhythmia in dog, 2: 145-154
occurring in case of subarachnoid hemorrhage, 1: 78-85
vectorcardiographic patterns in coronary artery disease, 3:265-272

Block
Atrio-ventricular
atrial recovery wave studied by averaging computer technique in patients with complete heart block, 3:243-251
atrial recovery wave studied by atrial pacing technique in patients with complete heart block. 4:325-332
AV & trifasicular block, 4:395-400
Mobitz type II AV block as manifestation of digitalis toxicity, 1:74-77
suggested mechanism for Mobitz type II block based on concealed atrial reciprocation, 4: 401-406
unusual cause for AV dissociation, 2:203-205
Bundle branch
false bilateral block, 1:100A-100B
right bundle branch block combined with left axis deviation, 2:127-134
transient complete left bundle branch block & left anterior hemiblock demonstrated by biplane timed VCGs, 1:90-95
W-P-W syndrome associated with myocardial infarction & right bundle branch block, 3: 299-305
Conduction
stretch-induced excitation & conduction disturbances in isolated rat myocardium, 1: 15-24
Hemiblock
left posterior hemiblock in cases of paroxysmal atrial tachycardia in infants & children, 3: 253-256
Multiple atrial arrhythmias in intra-atrial & inter-atrial block, 3:281-288
sino-atrial block in man provoked by quinidine, 3:289-294

Blood transfusion
hyperkalemic cardiac arrest during transfusion of stored blood, 4:407-409

Body surface potentials
mathematical analysis of, 4:367-371

C

Calibration
precordial, 1:99-100

Case studies
AV & trifasicular block, 4:395-400
changes simulating hypothermia in ECG in subarachnoid hemorrhage, 2:193-195
double-bifocal-ventricular parasystole, 1:86-89
effect of diphenylhydantoin on intraventricular conduction disturbance, 2:197-201
hyperkalemic cardiac arrest during transfusion of stored blood, 4:407-409
intermittent P- & T-wave sensing in demand pacemakers, 3:295-298
multiple atrial arrhythmias in intra-atrial & inter-atrial block, 3:281-288
observations on duration of Wedensky facilitation in left bundle branch, 2:185-191
1:1 conduction in atrial flutter after intravenous injection of aminophylline, 4:391-393
sino-atrial block in man provoked by quinidine, 3:289-294
sinoventricular conduction during atrial arrest, 4:385-389
suggested mechanism for Mobitz type II block based on concealed atrial reciprocation, 4: 401-406
transient complete LBBB & LAHB demonstrated by biplane timed VCGs, 1:90-95
unusual cause for AV dissociation, 2:203-205
ventricular bigeminy & quadrigeminy occurring in case of subarachnoid hemorrhage, 1:78-85
W-P-W syndrome associated with myocardial infarction & RBBB, 3:299-305

Children
anatomical level of X & Z electrodes in Frank VCG lead system, 4:355-365
computer interpretation of Frank VCG in normal newborns, 4:307-316
ECG in tetralogy of Fallot, 2:155-161
hyperkalemic cardiac arrest during transfusion of stored blood, 4:407-409
left posterior hemiblock pattern in cases of paroxysmal atrial tachycardia in infants & children, 3:253-256

Cineangiography
continuous recording of His bundle electrogram during selective cineangiography in man, 3: 233-242

Coding system
numerical classification & coding of ECGs, 4: 373-376

Computer
atrial recovery wave studied by averaging computer technique in patients with complete heart block, 3:243-251
computer-aided ECG analysis & research in clinical setting, 4:377-384
interpretation of Frank VCG in normal newborns, 4:307-316
polarcardiographic study of hospital staff — abnormalities found in smokers, 3:273-280
scalar & vectorcardiographic residua of inferior myocardial infarct, 2:163-172
ST-T changes induced by digitalis & ventricular hypertrophy: differentiation by quantitative analysis, 2:101-110
use of on-line computer in study of cardiac arrhythmia, 4:333-339

Conduction
critical prolongation of AV conduction time as inciting mechanism in reentrant tachycardia, 1:39-46

D

Diagnosis
scalar & vectorcardiographic residua of inferior myocardial infarct, 2:163-172

Digitalis
effect of diphenylhydantoin on intraventricular conduction disturbance, 2:197-201
Mobitz type II AV block as manifestation of digitalis toxicity, 1:74-77
ST-T changes induced by digitalis & ventricular hypertrophy: differentiation by quantitative analysis, 2:101-110

Diphenylhydantoin
effect of DPH on intraventricular conduction disturbance, 2:197-201

Dipole
anatomical level of X & Z electrodes in Frank VCG lead system, 4:355-365
rapid assay of dipolar & extradipolar content in human ECG, 3:211-223

Direct current defibrillators
comparative analysis of, 4:349-354

E

Ectopic beats
bigeminal rhythm, vectorcardiographic patterns in coronary artery disease, 3:265-272
double-bifocal-ventricular parasystole, 1:86-89
experimental bigeminal arrhythmia in dog, 2: 145-154
overdriving by pacing to suppress ventricular ectopic activity, 1:65-73

Einthoven
precordial calibration, 1:99-100

Electric-field projection
revised lead equations for frontal plane electrocardiography, 1:25-38

Electrical therapy
comparative analysis of DC defibrillators, 4: 349-354

Electrocardiogram
computer-aided ECG analysis & research in clinical setting, 4:377-384
in tetralogy of Fallot, 2:155-161
numerical classification & coding of, 4:373-376

Electrode
anatomical level of X & Z electrodes in Frank VCG lead system, 4:355-365
design of epicardial catheter electrodes for sensing cardiovascular potentials, 2:209-210
mathematical analysis of body surface potentials, 4:367-371
new method to measure non-uniformity in intact heart, 4:341-348

Epinephrine
intraventricular propagation time: biphasic effect of, 2:111-118

Excitability
observations on duration of Wedensky facilitation in left bundle branch, 2:185-191

Exercise testing
elevated ST segments with exercise in ventricular aneurysm, 4:317-323
use of on-line computer in study of cardiac arrhythmia, 4:333-339

F

Fallot's triology
suggested mechanism for Mobitz type II block based on concealed atrial reciprocation, 4: 401-406

G

Gabor-Nelson equations
rapid assay of dipolar & extradipolar content in human ECG, 3:211-223

Glucagon
effect of glucagon on intraventricular conduction, 2:207-208

H

Hahnemann system
computer-aided ECG analysis & research in clinical setting, 4:377-384

Hemorrhage
changes simulating hypothermia in ECG in subarachnoid hemmorrhage, 2:193-195
ventricular bigeminy & quadrigeminy occurring in case of subarachnoid hemorrhage, 1:78-85

His bundle
continuous recording of His bundle electrogram during selective coronary cineangiography in man, 3:233-242

Hyperkalemia
cardiac arrest during transfusion of stored blood, 4:407-409

Hypothermia
changes simulating hypothermia in ECG in subarachnoid hemorrhage, 2:193-195

I

Instrumentation
design of epicardial catheter electrode for sensing cardiovascular potentials, 2:209-210

Intracranial disease
ventricular bigeminy & quadrigeminy occurring in case of subarachnoid hemorrhage, 1:78-85

Intraventricular conduction
effect of diphenylhydantoin on intraventricular conduction disturbance, 2:197-201
effect of glucagon on intraventricular conduction, 2:207-208

Intraventricular propagation time
biphasic effect of epinephrine, 2:111-118

Ischemia
elevated ST segments with exercise in ventricular aneurysm, 4:317-323
excitation contraction correlates in true ischemia, 3:257-264

Isoprenaline
suggested mechanism for Mobitz type II block based on concealed atrial reciprocation, 4: 401-406

L

Lead systems
comparison of 12-lead & orthogonal electrocardiograms, with special reference to frontal QRS axis, 1:47-55
Frank VCG in beagle dog, 2:119-125
precordial calibration, 1:99-100
revised lead-equations for frontal-plane electrocardiography, 1:25-38
scalar and electrocardiographic residua of inferior myocardial infarct, 2:163-172

Left bundle branch
observations on duration of Wedensky facilitation in, 2:185-191
transient complete left bundle branch block & left anterior hemiblock demonstrated by biplane timed VCGs, 1:90-95

Letter to Editor
false bilateral bundle branch block, 1:100A-100B

M

Macruz index
and measurement errors, 1:96-98

Mathematical studies
mathematical analysis of body surface potentials, 4:367-371

Mayo clinic
computer-aided ECG analysis & research in clinical setting, 4:377-384
computer interpretation of Frank VCG in normal newborns, 4:307-316

Myocardial infarction
polarcardiographic study of hospital staff—abnormalities found in smokers, 3:273-280
scalar & vectorcardiographic residua of inferior myocardial infarct, 2:163-172
sinoventricular conduction during atrial arrest, 4:385-389
W-P-W syndrome associated with myocardial infarction & right bundle branch block, 3: 299-305

Myocardium
stretch-induced excitation & conduction disturbances in isolated rat, 1:15-24

N

Notation
macruz index & measurement errors, 1:96-98
precordial calibration, 1:99-100
revised lead-equations for frontal-plane electrocardiography, 1:25-38

O

Overdriving
by pacing to suppress ventricular ectopic activity, 1:65-73

P

Pacemaker
chaotic atrial rhythm, 2:135-144
false bilateral bundle branch block (letter), 1: 100A-100B
intermittent P- & T-wave sensing in demand pacemakers, 3:295-298
relationship among location, heart rate & P-wave configuration in dog, 1:56-64
unusual cause for AV dissociation, 2:203-205

Pacing
overdriving by pacing to suppress ventricular ectopic activity, 1:65-73

Parasystole
double-bifocal-ventricular parasystole, 1:86-89

Plasma
intraventricular propagation time: biphasic effects of epinephrine, 2:111-118

Polarcardiogram
polarcardiographic study of hospital staff—abnormalities found in smokers, 3:273-280

Potassium balance
excitation contraction correlates in true ischemia, 3:257-264
hyperkalemic cardiac arrest during transfusion of stored blood, 4:407-409

Precordial calibration, 1:99-100

Pre-excitation
experimental bigeminal arrhythmia in dog, 2: 145-154

Purkinje fibers
electrical properties of cells at Purkinje fiber-myocardial cell region of mammalian heart, 2: 173-183

Q

QRS axis
comparison of 12-lead & orthogonal ECG with special reference to frontal QRS axis, 1:47-55

Quadrigeminy
occurring in case of subarachnoid hemorrhage, 1: 78-85

Quantitative analysis
ST-T changes induced by digitalis & ventricular hypertrophy: differentiation by quantitative analysis, 2:101-110

Quinidine
sino-atrial block in man provoked by quinidine, 3:289-294

R

Radiotelemetry
use of on-line computer in study of cardiac arrhythmia, 4:333-339

Repolarization
new method to measure non-uniformity in intact heart, 4:341-348

Rhythm pattern
numerical classification & coding of the ECGs, 4:373-376

Right bundle branch
combined with left axis deviation, 2:127-134
W-P-W syndrome associated with myocardial infarction & right bundle branch block, 3: 299-305

Right ventricular hypertrophy
ECG in tetralogy of Fallot, 2:155-161

S

Scalar ECG
standard 12-lead scalar ECG, an assessment of left ventricular performance, 3:225-321

Sinoventricular conduction
during atrial arrest, 4:385-389

Smoking
polarcardiographic study of hospital staff — abnormalities found in smokers, 3:273-280

ST segment
elevated ST segments with exercise in ventricular aneurysm, 4:317-323

Stretch, effects of
stretch-induced excitation & conduction disturbances in isolated rat myocardium, 1:15-24

Surface potential
rapid assay of dipolar & extradipolar content in human ECG, 3:211-223

T

Tachycardia
critical prolongation of AV conduction time as inciting mechanism in reentrant tachycardia, 1:39-46
left posterior hemiblock pattern in cases of paroxysmal atrial tachcardia in infants & children, 3:253-256

Tetralogy of Fallot
ECG in, 2:155-161

Transthoracic resistance
comparative analysis of DC defibrillators, 4: 349-354

Treadmill stress segments
elevated ST segments with exercise in ventricular aneurysm, 4:317-323

V

Vectorcardiogram
anatomical level of X & Z electrodes in Frank VCG in normal newborns, 4:355-365
bigeminal rhythm, vectorcardiographic patterns in coronary artery disease, 3:265-272
computer interpretation of Frank VCG in normal newborns, 4:307-316
Frank VCG of beagle dog, 2:119-125
right bundle branch block combined with left axis deviation, 2:127-134
transient complete left bundle branch block & left anterior hemiblock demonstrated by biplane timed VCGs, 1:90-95

Vectors
revised lead-equations for frontal-plane electrocardiography, 1:25-38

Ventricle
Left
standard 12-lead scalar ECG, an assessment of left ventricular performance, 3:225-231
Right dominance
computer interpretation of Frank VCG in normal newborns, 4:307-316
Ventricle hypertrophy
ST-T changes induced by digitalis & ventricular hypertrophy: differentiation by quantitative analysis, 2:101-110

W

Wave
Atrial recovery
studied by averaging computer technique in patients with complete heart block, 3: 243-251
studied by atrial pacing technique in patients with complete heart block, 4:325-332
J-wave
changes simulating hypothermia in ECG in subarachnoid hemorrhage, 2:193-195
P-wave
atrial recovery wave studied by atrial pacing technique in patients with complete heart block, 4:325-332
intermittent P- & T-wave sensing in demand pacemakers, 3:295-298
multiple atrial arrhythmias in intra-atrial & inter-atrial block, 3:281-288
relationship among pacemaker location, heart rate, & P-wave configuration in dog, 1:56-64
ST-T wave
changes induced by digitalis & ventricular hypertrophy: differentiation by quantitative analysis, 2:101-110

Wedensky phenomena
observations on duration of Wedensky facilitation in left bundle branch, 2:185-191

Wenckebach-Luciani phenomenon
sinus venosus-atrial, 1:1-14

Wilson-Bayley equation
rapid assay of dipolar & extradipolar content in human ECG, 3:211-223

Wolff-Parkingson-White syndrome
associated with myocardial infarction & right bundle branch block, 3:299-305
